### SUMMARY

---

Full-Stack Engineer with 4 years of experience building scalable web applications using TypeScript, Angular, React, and Node.js. Strong background in modern frontend architecture, state management, and API-driven systems, delivering maintainable, production-ready solutions.

### EXPERIENCE

---

#### Frontend Developer (Freelance)

*Originator Inc*

Feb 2025 – present

*Remote*

Worked on a SaaS platform for generating and reviewing training and evaluation data for AI agents running on open-source software, combining automated verification with human-in-the-loop reviews.

- Developed React interfaces displaying AI agent task attempt histories with screenshots and transcripts.
- Built a lean, task-centered UI using Tailwind CSS to optimize clarity, efficiency, and minimize cognitive load.
- Implemented role-based workflows for reviewer training, task assignment, and progression tracking.
- Partnered with AI, product, design, and QA teams to deliver front-end features and ensure quality.
- Contributed to human-in-the-loop validation of AI agent behavior and automated verification results.

**Technologies:** React, JavaScript, Typescript, Tailwind CSS, Supabase, AWS

#### Full-Stack Developer (Freelance)

*NHB Technologies*

Sep 2024 – Jan 2025

*Remote*

Built and supported custom web applications for small businesses, adding features, fixing bugs, optimizing speed and UX, and handling Firebase deployments with automated CI/CD workflows.

- Built RESTful APIs and integrated third-party services (e.g., payment gateways, CMS platforms).
- Improved performance and implemented modern UI/UX with Tailwind CSS and reusable component libraries.
- Managed full project lifecycle, from requirements gathering to deployment on Firebase.
- Set up automated CI/CD pipelines to streamline deployment and ensure consistency.

**Technologies:** React, Angular, JavaScript, TypeScript, Tailwind CSS, Node.js, Firebase

#### Full-Stack Developer

*Xevlabs*

Jan 2022 – Jul 2024

*Remote*

Worked on production platforms for French clients across ERP, e-learning, e-commerce, and cryptocurrency domains, contributing to frontend architecture, backend services, and shared internal libraries.

## Diploma — E-learning SaaS Platform (Medical Education)

- Built interactive dashboards for tracking student progress and performance metrics.
- Developed calendar-based workflows for exams, events, and training sessions.
- Improved scalability and performance through architectural refactoring and UI optimizations.

## Dalbe — E-commerce & ERP Platform

- Built admin dashboards and modular UI components for merchant-facing workflows.
- Developed Shopify-integrated applications managing 6,000+ products and 24,000+ variants.
- Implemented serverless workflows for inventory, orders, and loyalty automation.
- Contributed to role-based access control and feature toggling for secure rollouts.

## Mon Livret C — Cryptocurrency Investment Platform

- Developed user-facing interfaces for managing crypto investments, balances, and transaction flows.
- Integrated Fireblocks for secure digital asset custody and transaction execution.
- Worked within security- and compliance-aware constraints typical of institutional crypto products.

## Cross-Project & Team Contributions

- Developed and maintained RESTful APIs with Firebase services.
- Created shared front-end and backend libraries to improve reuse and development velocity.
- Collaborated in Agile workflows, including sprint planning, code reviews, and cross-team discussions.

**Technologies:** React, Angular, JavaScript, TypeScript, Tailwind CSS, Node.js, Firebase, Shopify, Fireblocks, PostgreSQL, GCP

## Software Engineer Intern

Mar 2021 – Nov 2021

SQOIN

Tunis, Tunisia

Contributed to a cryptocurrency crowdfunding platform backed by the Central Bank of Tunisia, focusing on Frontend development, integrations, and internal tooling.

- Built a Metamask-integrated crypto-wallet with a custom KYC system using facial recognition.
- Developed an admin dashboard for managing users and transactions, with dynamic charts and graphs.
- Integrated third-party APIs and documented REST endpoints using OpenAPI for efficient developer onboarding.

**Technologies:** Angular, JavaScript, Node.js, PostgreSQL, Web3.js, Smart Contracts, OpenAPI

## EDUCATION

---

### The Private Higher School of Engineering and Technology (ESPRIT)

Tunis, Tunisia

Software Engineering and Development Diploma

Sep 2018 – Jun 2022

### Faculty of Sciences of Tunis

Tunis, Tunisia

Preparatory Cycle For Engineering Studies Diploma (Math/Physics)

Sep 2016 – Jun 2018

## SKILLS

---

**Frontend:** JavaScript, Typescript, Angular (RxJS, NgRx), React (Next.js), Vue (Nuxt.js), Tailwind, HTML, CSS, SASS

**Backend:** Node.js, Firebase, Shopify, SQL/NoSQL Databases (MySQL, PostgreSQL, MongoDB)

**Tools & Testing:** Git (GitHub, GitLab), Github Actions, Nx, Docker, Google Cloud Platform, Jest, Jasmine, Playwright

## LANGUAGES

---

**English** - Full proficiency

**French** - Full proficiency

**German** - Intermediate proficiency

**Arabic** - Native proficiency
